

2023 HOMESCHOOL FAMILY CONFERENCE

AUGUST 7-8, 2023

How to Teach Math

Why Excel at Math?

- God is a Creator.
- He wants us to create things with excellence, too.
- There is truth. There are moral absolutes.
- Math builds upon previous facts (Isaiah 28:9-10).
- Math helps us memorize, which ensures math is easier.
- Math teaches us to finish a job with excellence.
- Math is a fun area to introduce competition.
- Math teaches self-discipline.
- Math teaches obedience.

How to Use Homeschooling Torah's Arithmetic Program:

- Be sure to read the Introduction. 😊
- Together Math Drills
 - 3-5 times per week
 - Very important
 - Do K-3 together and 4-8 together
- Worksheets
 - Work the first few problems together on the White Board.
 - Your student can finish the rest during "Homework" time.
 - Days 4-5 can usually be done independently.
- Make manipulatives from things in everyday life.
- Day 5 is always a test. Be sure to consult the Teacher Guide.
- Repeating levels is a GOOD thing.
 - Week 36 of each level can be used as a placement test.
 - If facts aren't memorized, the level should be repeated.
